

get to know Bubblez...

Bubblez does not have a stomach!

Goldfish don't have stomachs, which is why they have to be fed easily digestible foods in small amounts.

Bubblez recognizes my face!

Goldfish can also see different shapes and colors.

Bubblez sleeps with her eyes open.

Goldfish do not have eyelids, so they cannot close their eyes.

Bubblez can remember things for up to 5 months!

Scientists have proven that goldfish memory spans are much longer than three seconds (a common myth). In fact, their memory generally lasts at least 5 months! Isn't that amazing! I usually can't remember where I put my homework!

Bubblez knows me!

Goldfish can get used to their owners and will stop considering them a threat. I am training her to eat from my hand!
